

**OPTI**pack

Our packaging for your success

Strikingly different on point of sale!

Optipack GmbH is one of Europe's leading manufacturers of PS and PP cups as well as PET preforms for the food industry. Whether cups for dairy products, ready meals, snacks, dried fruit or cereals, we have the right solution. Our analysis methods and simulation models reveal potential savings in cup weight or optimisation of pallet utilisation.

## DIREKT PRINTING

### High performance with sophisticated design

In the so-called „wet-on-wet“ printing process, white or transparent cups can be printed with up to eight spot colours and up to 600 cycles per minute in a single printing process. An automated set-up process allows fast format and diameter changes..

## DESTO

### The less plastic the better

The basis for our Desto cup is a plastic lightweight cup made of PS, PP or PET. The cup is completely wrapped with a cardboard banderole up to the sealing edge and printed with a maximum of six colours in an offset process. The result is an aesthetic cup with up to 40% reduced plastic content.

## SLEEVE

### For a decoration independent of geometry

To produce a sleeved cup, a shrink sleeve is applied to a white or transparent cup and then subjected to hot steam in a so-called steam tunnel. Sleeves are printed using a combined offset/gravure printing process and gravure printing. Almost the entire body of the cup can be used as a printing surface.

## LABEL

### Variable for individual use

In this segment, round cups can be decorated with a self-adhesive label based on carrier tape. On request, bottom labelling of the cup is also possible. The labels are printed using the EB offset printing process. Paper and PP film with a lamination in white and transparent can be used as label face material.

## OUR CUSTOMERS

We owe our success and experience to our customers. These brands trust us!
